

HR Analytics Dashboard | Power BI

Project Overview

This project is an interactive **HR Analytics Dashboard** built using **Microsoft Power BI**. The dashboard helps HR teams analyze employee attrition, workforce distribution, and employee demographics to support data-driven decision making.

Objectives

- Analyze employee attrition trends
- Identify departments with high turnover
- Understand attrition by job role, age group, gender, and salary group
- Create an interactive dashboard for HR managers

Tools & Technologies

- Microsoft Power BI
- Power Query
- DAX (Data Analysis Expressions)
- CSV Dataset

Dataset

The dataset contains HR employee information, including:

- Employee ID
- Age
- Gender
- Department

- Job Role
- Monthly Income
- Business Travel
- Education
- Attrition
- Job Satisfaction
- Work-Life Balance
- Years at Company
- and other HR-related attributes.

Dashboard KPIs

-  Total Employees
-  Active Employees
-  Total Attrition
-  Attrition Rate

Dashboard Visualizations

- Attrition by Department
- Active Employees by Department
- Attrition by Job Role
- Attrition by Gender
- Attrition by Age Group
- Attrition by Salary Group

Interactive Filters

The dashboard includes slicers for:

- Department
- Gender

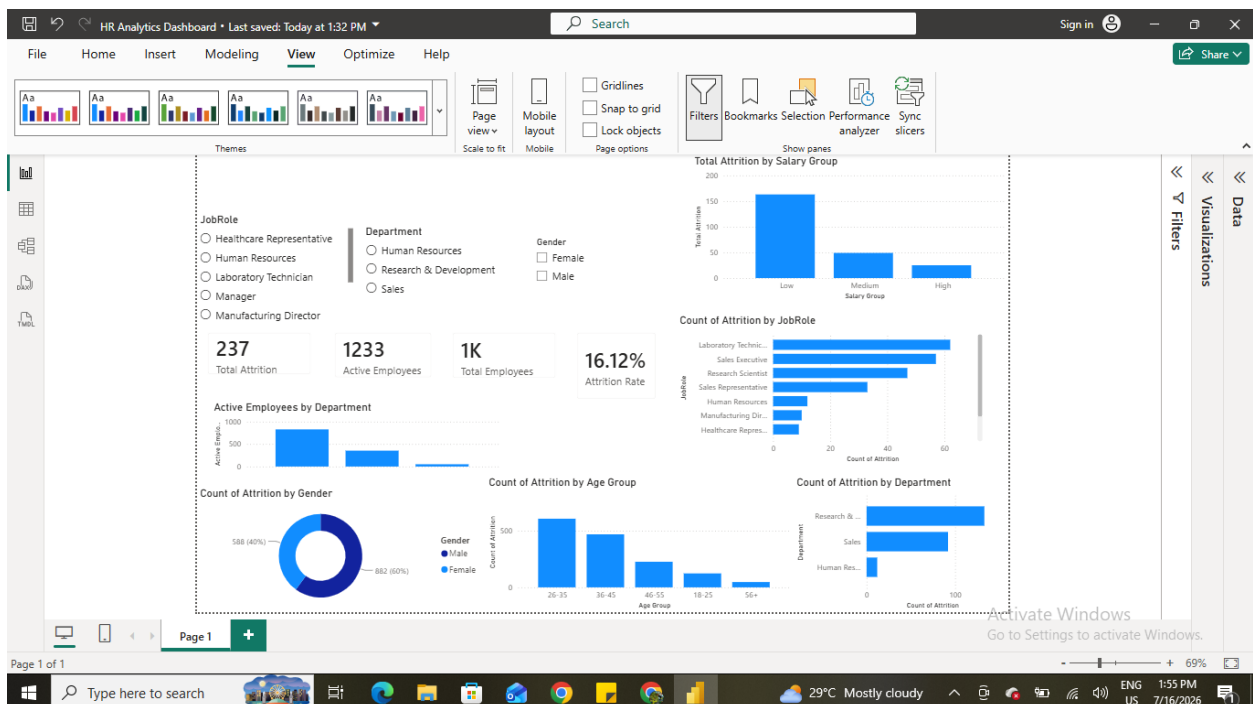

- Job Role

These allow users to interactively filter all dashboard visuals.

💡 Key Business Insights

- Research & Development has the largest workforce.
- Laboratory Technicians experience the highest employee attrition.
- Employees in the lower salary group have the highest turnover.
- Employees aged 26–35 show the highest attrition.
- The dashboard enables HR managers to identify workforce trends and areas requiring attention.
